## **Crop Care to take over management of CLEARFIELD® products**

Nufarm Australia Limited and Crop Care Australasia today announced changes to the management of the CLEARFIELD® cropping system.

The CLEARFIELD production system is an extremely important platform for Australian agriculture into the future.

From January 2010, Crop Care will take over marketing, administration and support for the complete CLEARFIELD systems and range of products, which include Intervix®, Midas® and Onduty® herbicides.

A clear strategy is being developed to manage the change over efficiently with minimal disruption. Nufarm will conduct the normal 'end of season' book outs and reconcile stock by December 2009.

We understand that you may have questions about requirements of your business as part of the transfer process. A detailed strategy will be put in place to ensure that the transition is as smooth as possible.

Regular communication with all AgriCentre clients will be forthcoming in the next few weeks to keep you informed and to introduce you to the Crop Care CLEARFIELD team.

In the meantime, please contact Brea Milvain, Agricentre Manager, on (03) 9282 1483 or at [brea.milvain@au.nufarm.com](mailto:brea.milvain@au.nufarm.com) if you have any queries.

Regards,

Lachlan McKinnon
