

# Broadway<sup>®</sup> Herbicide

Broadway herbicide is a co-formulation of 432 g / L of Glyphosate 450 plus 7.2 g /L of Carfentrazone (the same active ingredient contained in Hammer<sup>®</sup>).

The addition of Carfentrazone helps to enhance the brown out time of the glyphosate and assists in controlling difficult, harder to manage broadleaf weeds such as marshmallow and nettles. This is particularly useful around livestock yards, fence lines, sheds as well as fire breaks.

Broadway can be applied by Boomspray or knapsack sprayer.

## Features:

- Faster burn down than glyphosate alone
- Better on large weeds
- Convenient 5 L Pack size
- Simple 34 ml per 10 L spray pack
- No need for additional surfactant
- Low hazard to the user and environment

## Ideal for:

- Small Landholders
- Hobby Farmers
- Councils
- For use around shed and stock yards
- Firebreaks
