

Ramrod Update

Dear Customer,

Please be advised of additional details regarding packaging of the new source of Ramrod for the Australian market.

The first pack-off of the new Ramrod source contained blue caps, whereas subsequent pack-offs have utilised green caps. Green caps will remain the cap colour for all future Ramrod pack-offs.

The blue and green caps have been aimed at differentiating the new source from the former Ramrod packaging which contained a white cap, so that new product is easily identifiable.

The same product code (0899-10L) and packs per pallet (50 x 10L) applies.

For further information, please contact your local Crop Care Territory Sales Manager or Crop Care Customer Service on 1800 111 454.

Sincerely,

Rob Walker
